AN ACTIVITY FOR ANIMAL LOVERS OF ALL AGES

Plenty of opportunities for groups to experience the excitement of a visit to Bioparco and to see the most varied species of animals, discover their features, and learn fun facts about them in the company of specialized staff.

NATURE JUST FOR YOU!

An exciting itinerary among tigers, lions, giraffes, and a host of other species, to learn all their secrets down to the smallest detail. The activity concludes with a very, very close encounter with insects, amphibians, reptiles, and small mammals.

CARTOON ANIMALS

What are our cartoon heroes like in real life? In a fun itinerary, we get a close-up look at Dumbo the elephant, Koda the bear, Marty the zebra, and many other cartoon stars. They're all here at Bioparco, and can't wait to meet you!

THE FIVE SENSES

Sharp-eared lynxes, lemurs with night vision, tapirs with an infallible sense of smell, reptiles who smell with their tongues... animals have senses quite different from ours, and perceive their surrounding environment differently. A very special exploration of the sensory world of animals.

FINS, FEATHERS, AND WEBBED FEET

Seals living in ice-cold water, hippopotamuses that submerge for more than ten minutes at a time, and ducks that never get wet. How is this possible? Find out all the answers in an itinerary to learn the unique features of the species living in aquatic environments.

EXPLORING BIODIVERSITY

What bird doesn't fly? Who walks by leaping, and what animals carry their young on their backs? Like true explorers equipped with compass, binoculars, a map, and clue sheets, we go off in search of very special animals from every corner of the planet.

A JOURNEY AROUND THE WORLD

A stroll around the Bioparco to discover the species populating the Earth: from the tropical forest to the African savannah, from deserts to wooded environments, as we learn a host of interesting facts about animals and the adaptations they have evolved in order to live in their habitat.
